DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the protrusion extending to the same extent around an entire circumference of the post must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification fails to mention at least a portion of the shaft having a cylindrical shape.

Claim Objections

3. Claims 19, 20, and 22 are objected to because of the following informalities: Claims 19, 20, and 22 recite the limitation "the protrusion" in lines 1-2 of claims 19 and 20 and in line of claim 22. There is insufficient antecedent basis for this limitation in these claims because "at least one protrusion" has been established in claim 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 3-7, and 18-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 18, it is unclear what is meant by each post comprising a shaft and at least one protrusion disposed near the end of the shaft away from the base of the retainer. Specifically, it is unclear if the each post is being claimed as having a protrusion or if each post is being claimed as having

Art Unit: 3767

at least one protrusion such that more than one protrusion may be on the end of the shaft of each post. Furthermore, in the instance that more than one protrusion is on the end of the shaft, it is unclear which protrusion on that shaft is to be received in or disposed within the recess of the corresponding cap.

Response to Arguments

6. Applicant's arguments, see line 9 of page 7 to line 11 of page 8, filed February 8 2007, with respect to claims 1, 8, 17, and 18, being rejected under 35 U.S.C. 102(e) and 35 U.S.C. 103(a), have been fully considered and are persuasive. The rejection of claims 1, 3-9, and 11-18 under 35 U.S.C. 102(e) and 35 U.S.C. 103(a) has been withdrawn.

Allowable Subject Matter

7. Claims 1, 3-7, and 18-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph and the nonstatutory obviousness-type double patenting rejection, set forth in this Office action.

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 3767

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1, 3-9, and 11-22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 39-41 of U.S. Patent No. 6,582,403. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are all drawn to a retainer having a plurality of posts.
